

ALITRACK ROLL

Aluminium Heavy Duty Temporary Access and Ground Protection System

ALITRACK ROLL PRODUCT OVERVIEW

Our Aluminium Trackway Rolls provide a quick and easy installation for temporary roadways. The AliTrack Roll enables the user to create a 25m x 3m heavy duty roadway in a matter of minutes, with no mechanical assistance required, saving time and cost against other alternatives. This is highly advantageous in sectors such as Events, Film & TV, Site Investigation and many more

Due to its unique design, our Aluminium Trackway Rolls are capable of supporting loads of up to *150 tonnes, setting a performance benchmark in its extreme light weight and incredible durability, coupled with the title of the fastest deploying trackway system in the world. Our proven AliTrack Panel traction surface has been duplicated in our AliTrack Roll and is certified in giving the best grip for vehicles or pedestrians in all conditions.

PERFORMANCE PROPERTIES

Size	25m x 3mm	Installation Speed	A roll can be installed and de-installed in less than 5 minutes.
Thickness	30mm	Load Capacity	Can take weights of up to 150 tonnes (dependent upon ground conditions)
Surface Area	75m ²	Transport	Up to 10 AliTrack Rolls per Lorry based on a standard 13m bed.
Weight	1800kg	Warranty	All Materials used are covered by our comprehensive Warranty, standard Terms and Conditions apply.
Colour	Natural Aluminium finish		
Material	Aluminium		
Installation Method	Installation by hand or forklift.		

*Dependent upon ground conditions
